

<u>Sensor Image</u>	<u>Sensor Name</u>	<u>What it measures</u>	<u>Unit of Measure</u>
	Thermometer	<i>“The measurement of hot and cold”</i>	<b>Degrees Celsius (°C)</b>
	Anemometer	<i>“The force exerted by the wind”</i>	<b>Kilometers per hour (km/h)</b>
	weather vane	<i>“The direction <b>from</b> which wind is blowing”</i>	<b>Angle from North (°)</b>

	Rain gauge	<i>“A depth per unit area of rain”</i>	<b>millimeters (**mm?/ml ???)</b>
	barometer	<i>“The force per unit of area exerted by the air”</i>	<b>kilopascals (kPa)</b>
	AIR QUALITY sensor	<i>“How contaminated the air is”</i>	<b>Air quality, %</b>
	hygrometer	<i>“The amount of water vapor in the air”</i>	<b>Relative humidity, %</b>
